October 2, 2008

To Whom It May Concern:

In October of 2003, the Cartersville Parks and Recreation Department contracted the services of Pettit Timber, Inc. Our contract was for Pettit Timber to select cut marked pine trees inside Dellinger Park. The area to be select cut consisted approximate 50 acres of undeveloped land. As this land is never to be developed but to remain in its nature state, it does have trails traversing through the area and many, many park patrons' use these trails daily. Pettit Timber worked extremely well with our department to insure that the healthy trees remaining were not damaged during cutting project. Pettit Timber and their employees also took extreme care in marking off their staging area and closing sections of the trail to keep our patrons safe during the cutting process.

Today we now have a healthy forest and very attract park in large part to the extreme care that Pettit Timber took during the project.

I would highly recommend Pettit Timber, Inc. to anyone that needs special attention in cutting trees from their property.

Sincerely,

Greg Anderson
Director of Parks & Recreation
